Mounting Ring

Plug Kit is fitted
to existing cable

Evo LED Light

- 1) Float the existing Autumn Solar Pool Light to the pool deck and cut the cable, leaving sufficient cable length for future servicing.
- 2) Fit the Quick Connect Plug Kit to the existing cable, choose the cable seal that fits firmly over the cable, and then refer to the Replacement Light Kit Installation Instructions, attached.
- 3) Once the Plug Kit is fitted, slide the Eyeball Mounting Ring over the cable.
- 4) Connect the Plug Kit to the rear of the Evo LED Light and hand-tighten the Connector Nut.
- 5) Bayonet the Evo LED Light onto the tabs located on the front face of the Eyeball Mounting Ring. Screw the Evo LED Light onto the Eyeball Mounting Ring screw hole provisions, using two screws provided.
- 6) Push the Eyeball Mounting Ring (which is now connected to the pool light) into the recess on the existing black Autumn Solar housing.
